

$\Lambda_c(2940)^+$

$I(J^P) = 0(?^?)$  Status: \*\*\*

A fairly narrow peak of good statistical significance first seen in the  $\rho D^0$  mass spectrum. It is not seen in  $\rho D^+$ , and thus it is probably a  $\Lambda_c^+$  and not a  $\Sigma_c$ . It is also seen in  $\Sigma_c(2455)^{0,++} \pi^\pm$ .
